- Creative
- Teamwork
- Communication
- Adaptability

# Oskar Drygalski

*I am a 2nd year computer science student and a member of the InnoGames team for over 2 years. While living in Great Britain I worked and trained English Language I was involved in the production of luxury mattresses there. Two years ago I decided to return to Poland. Additionally, in the previous year I completed a bartending course and started learning Spanish.*

*I spend most of my free time on inccreasing my skills by learning about the aspects of a front-end developer, as it is my dream job in the future. My hobbies include windsurfing, IT curiosities as well as football. Since September this year, I am also a volunteer at a shelter for homeless animals.*

## Projects
